

# Assignment M5

Jeremy Martinez

[jmartinez91@gatech.edu](mailto:jmartinez91@gatech.edu)

*Abstract* — I will be focusing on a website's navigation bar. The nav bar is usually the main call to action when visiting a homepage of a web application and provides context for what actions are available. I will compare navigability between desktop/mobile versions of a website as well. See note on prototypes in appendix A.
